

Task: React Props and ReactDOM Rendering

Code:

Components:

Cart.jsx

```
class Cart {  
  
  constructor(itemname, price) {  
  
    this.itemname = itemname;  
    this.price = price;  
  
  }  
  
}  
  
export default Cart;
```

OnlineShopping.jsx

```
import React, { Component } from "react";  
import Cart from "../Cart";  
  
class OnlineShopping extends Component {  
  
  constructor(props) {  
  
    super(props);  
  
    this.state = {  
  
      items: [  
  
        new Cart("Laptop", 55000),  
  
        new Cart("Mobile Phone", 25000),  
  
        new Cart("Headphones", 3000),  
  
        new Cart("Keyboard", 1500),  
  
      ],  
  
    },  
  
  }  
  
}
```

```
        new Cart("Mouse", 800)

    ]

};

}

render() {

    return (

        <div>

            <h1>
                Online Shopping Cart
            </h1>

            <table border="1">

                <thead>

                    <tr>

                        <th>
                            Item Name
                        </th>

                        <th>
                            Price
                        </th>

                    </tr>

                </thead>

                <tbody>

                    {

                        this.state.items.map(
```

```
        (item, index) =>
        (
            <tr key={index}>

                <td>
                    {item.itemname}
                </td>

                <td>
                    ₹{item.price}
                </td>

            </tr>

        )
    )
}

</tbody>

</table>

</div>

);

}

}

export default OnlineShopping;
```

App.jsx

```
import OnlineShopping from "../Components/OnlineShopping";

function App() {

  return (

    <OnlineShopping />

  );

}

export default App;
```

Output:
